

Weekly Nerd | 1 Stephen Hay

IN your opinion, what skills do ^{recently graduated} ~~young~~ developers lack the most nowadays?

Setup main categories of guidelines

↳ setup rules for them

↳ think about it once with the team
and never worry about it again.

Test everything!

everything contextual

↳ colors, typography etc
keep in mind

What advice would you give to
~~students~~ like us yourself if you were
one of us? ~~about~~ for the next few years?

PS & Sketch → great tools, but assumptions
↳ work in browser

Start with small screen

↳ content, priority, easier and content
↳ where does the design not work anymore

Don't use dark patterns

↳ profits on short term

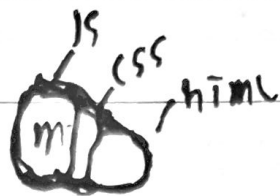

↳ hurts brand on long term

IT'S ABOUT
THE BASICS

go for a solid
Foundation.

Browser technologies

not only the correct use of `<script>` `<h1>` and stuff, but also correct attributes and stuff

Break the web
